Wall/Pipe Mount Kit for MGS-550 Remote Sensing Head
Installation Guide

P/N: 1100-1033
August 2016, Revision 0

⚠️ **CAUTION**

Any installation of the Wall/Pipe Mount Kit for the Remote Sensing Head requires full understanding and strict observance of the Bacharach User Manual (part number 1100-1000).
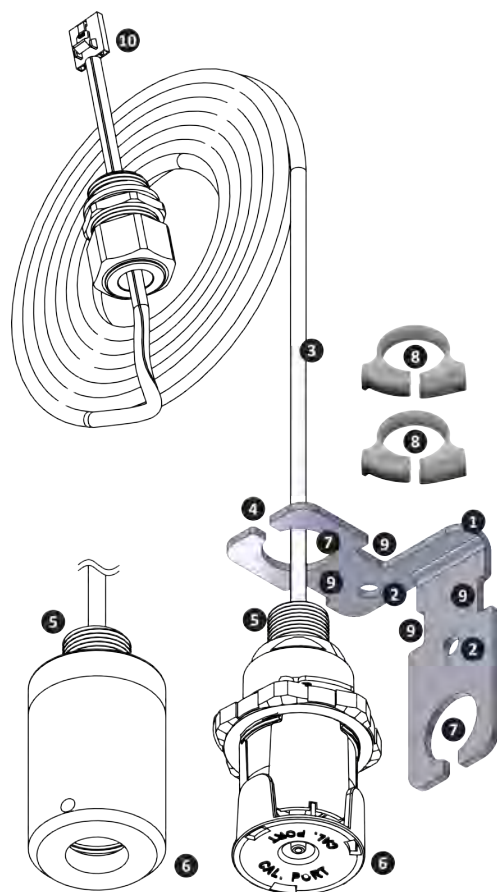

1   Intended Use

The Wall/Pipe Mount Kit (part number 6600-8962) consists of the bracket (❶) and 2 snap clamps (❽). It is intended for mounting a Remote Sensing Head onto a wall or pipe.

2   Option A - Wall Mounting

Step	Wall Mounting Instructions
a	Drill a hole at the required measurement point (❷).
b	Fasten the desired side of bracket (❶) using screw (not included) through hole (❷).
c	Feed the cable (❸) through the slot (❹) in the bracket.
d	Feed the thread (❺) of the Sensing Head (❻) through the hole (❼) in the bracket, then tighten a snap clamp (❽) around the thread of the Sensing Head (❺) to secure it.

3   Option B – Pipe Mounting

Step	Pipe Mounting Instructions
a	At the required measurement point, fasten the bracket (❶) using 3/8" (10 mm) wide straps (not included) around the pipe and the bracket notches (❾).
b	Feed the cable (❸) through the slot in the bracket (❹).
c	Feed the thread (❺) of the Sensing Head (❻) through the hole (❼) in the bracket, then tighten a snap clamp (❽) around the thread of the Sensing Head (❺) to secure it.

4   Electrical Connection

Complete the electrical connection (❿) and assembly of the instrument in accordance with the User Manual (part number 1100-1000).
