diameter

30 cm / 11.8 in

OPTIONS & ACCESSORIES

The Sun Shade was designed to provide shade and reduce glare on the display of any CETCI gas detection system device, ensuring readability in sunny locations. It may also be used as a rain and snow shield or provide additional protection in applications where there is a lot of dust, dirt or debris that falls and settles on surfaces.
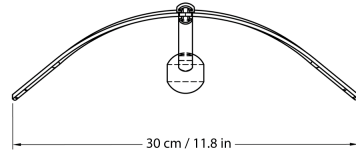

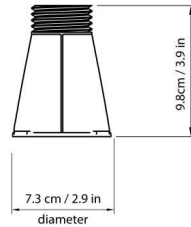

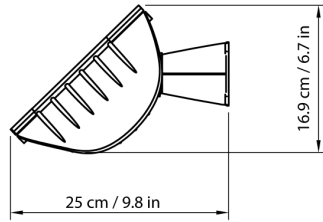

The Sun Shade should be mounted to the wall over top of the device. Once installed, the shield can be pivoted to the preferred angle and changed whenever needed.

KEY FEATURES

» Reduces glare on the display
» Provides protection from rain and snow
» Easily pivots to cover all angles
» Easy to install

TECHNICAL SPECIFICATIONS

MECHANICAL

Material	Black carbon fibre reinforced nylon
Size	30 cm / 11.8 in span width
Weight	272 g / 9.6 oz
