

What is eBOOST™?

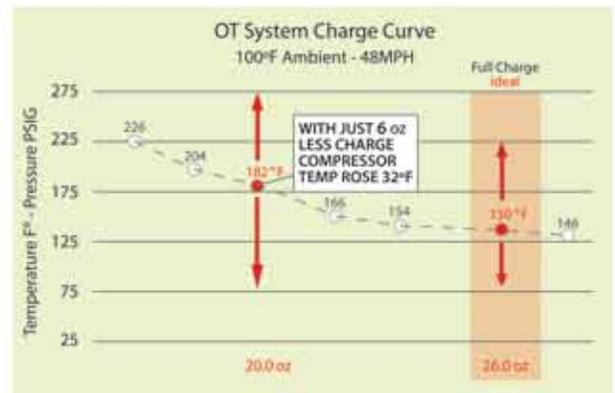

eBOOST™ is a proprietary performance enhancing supplement developed by UView to boost the performance of lubricants. When used in an air conditioning system eBOOST™ will increase the lubricity and anti-wear properties of the oil and rejuvenate rubber seals and O-rings, thereby helping extend the life and performance of the A/C system and compressor. The eBOOST™ supplement advantage:

- Condition seals & prevent leaks
- Reduce compressor temperature/friction
- Quiets noisy compressors
- Reduce fuel consumption and emissions

Why use a product with eBOOST™?

All A/C Systems Leak. As they lose refrigerant it affects the oil circulation in the system, causing increased compressor temperature and wear. When the oil in the system exceeds its operating temperature range, the life expectancy of the oil is reduced. eBOOST™ helps A/C oil tolerate higher temperatures and provide longer protection.

Recent MACS studies have proven that the A/C Compressor is replaced on 20% of the vehicles that have their A/C system serviced. Replacement rates increase with the age of the vehicle and this is directly attributed to the lack of preventative maintenance. In the USA alone there are 25 million compressors replaced per year. With eBOOST™ the oil's lubricity is restored. The A/C system and compressor life is extended.

8oz (240ml) Cartridge
Services 16 Vehicles or
32 small A/C Systems

Part No. 499109

8oz (240ml) Bottle
Services 16 Vehicles or
32 small A/C Systems

Part No. 499009

A/C Dye with eBOOST™

A unique combination of a superior A/C Dye with UView's proprietary concentrated supplement – eBOOST™.

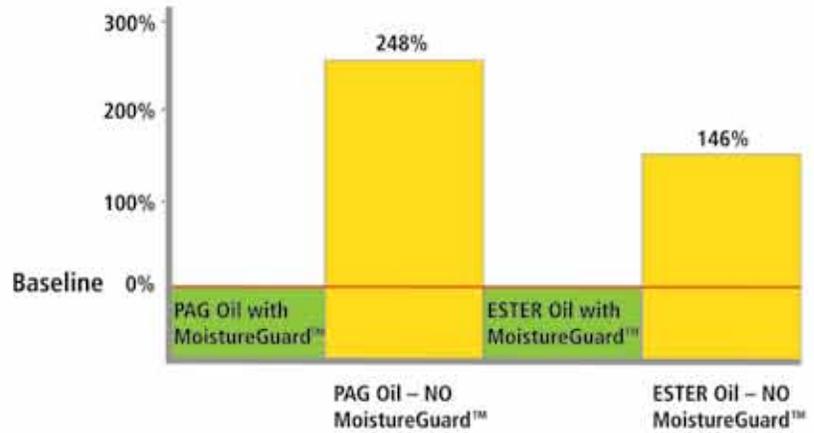

- eBOOST™ helps extend the life of the A/C system and compressor
- Conditions rubber O-rings and seals, helping prevent leaks
- Increases lubricity and anti-wear properties, helps quiet noisy compressors and lowers compressor temperature
- Provides added value and convenience
- Reduces comebacks

A/C Dye with eBOOST™ is the only product on the market today to offer these benefits in a single concentrated package.

MoistureGuard™ Technology

UView's MoistureGuard™ Technology is highly effective at removing and inhibiting moisture. The chart shows the results of testing A/C Oils with MoistureGuard™ Technology vs. conventional A/C Oils. The test simulates the shelf life of a sealed container with A/C Oil. As the results indicate, products without MoistureGuard™ had a dramatic increase of moisture content. MoistureGuard™ prolongs the overall shelf life of products and decreases the ability of Ester Oils to form acids, which can harm A/C Systems.

Test simulates the shelf life of a sealed container of A/C Oil. The test was conducted in an environmental chamber using sealed containers. (This represents a two year shelf life)

These premium Universal Oils with Dye contain UView's proprietary eBOOST™ Supplement.

- Includes MoistureGuard™ Technology
- With Universal PAG and ESTER, no need to stock multiple grades of oil

Universal PAG Oil
16oz (480ml) Bottle

Part No. 488016P

Universal ESTER Oil
16oz (480ml) Bottle

Part No. 488016E
