Description

The EE600 system consists of a pump unit and a separate 3-level float switch sensor. It comes with mounting accessories like pads of double-sided padded tape to fix the float switch and an anti-shock mount for the pump unit.

Usage

This float type pump is mainly used in air conditioners with a limited space inside, e. g. wall mounted mini split and ceiling units. The small sensor can easily be adapted to the air conditioner's condensate drain hose.

Special features

- integrated buzzer (beeper), can be deactivated
- Impervious to blockage or contamination due to unique valve design and large piston bore

Performance

Inside the box

- integrated buzzer (beeper)
- pump block with vibration dampers
- three-stage float switch with dirt retainer
- 300mm acoustic damping/reducing discharge tube (6mm ID) with hose connector
- PVC vent hose
- 2x cable ties
- 2x double sided padded tape
- silicon hose (internal diameter 15 mm, length 40mm - connects to split drain hose)
